RESEARCH INTERESTS

Representation Learning: learning representations from heterogeneous data and interaction histories for reliable agentic memory that adapts to evolving human context and supports longitudinal personalization.

Human–AI Interaction: designing and evaluating conversational AI that helps people articulate their needs and make informed decisions, while eliciting feedback that informs model learning.

EDUCATION

Korea University *Mar 2025 – Feb 2027 (Expected)*
M.S. in Computer Science and Engineering
Advisor: Prof. Susik Yoon

Korea University *Mar 2022 – Feb 2025*
B.E. in Computer Science and Engineering

Korea University *Mar 2016 – Feb 2022*
B.F.A. in Industrial and Information Design
2 years of Military Service: Republic of Korea Air Force (2017 – 2019)

Relevant Coursework: *CS/AI* - Algorithms (A+), Computer Architecture (A), Artificial Intelligence (A), Deep Learning (A), Optimization Theory (A), Reinforcement Learning (A), Natural Language Processing (A), Brain and Machine Cognition (A+); *Design/HCI* - Interaction Design (A+), Interface Design (A+), Design and Human Factors (A+), Design Methodology (A+).

RESEARCH EXPERIENCE

DAIS Lab, Korea University *Aug 2024 – Present*
Research Intern (Aug 2024 – Feb 2025); Research Assistant (Mar 2025 – Present)

Calibrated User Beliefs for Conversational Agents *May 2026 – Present*

- Defining long-horizon tasks for response personalization and agent action selection.
- Designing evaluation protocols to assess calibration of predicted probabilities that remembered preferences apply in new contexts, using subsequent user judgments.
- Exploring how to estimate uncertainty from learned representations and whether these estimates can improve response personalization and clarification decisions.

Structured Understanding in Evolving Information Streams **KDD 2026**

- Developed the Temporal QA task, one of three benchmark tasks alongside Topic Clustering and Summarization.
- Implemented its evaluation protocol, benchmark dataset, and human-annotation guidelines.

Structured Understanding of Tabular Data **ICML 2026; SIGIR 2025**

- Led two first-author projects on domain-specific tabular representation learning.
- Proposed header anchoring to regularize contextualized header embeddings toward context-independent anchors, stabilizing semantics across row contexts and schema variants.
- Developed a pretraining method that jointly learns schema and column contexts with entropy-routed objectives to preserve domain-coherent and instance-specific attribute semantics.

APPLIED RESEARCH COLLABORATION

Foundation Models for Enterprise Relational Data, KT (Korea Telecom) *Mar 2025 – Present*

- Collaborated with KT on foundation-model methods for enterprise relational databases.
- Analyzed challenges in adapting tabular ML to organizational data with heterogeneous schemas.
- Prototyped a pretraining pipeline for schema-aware attribute representations for enterprise tables.
- Investigating schema-linking methods that map natural-language questions to relevant tables and columns.

SELECTED PROJECTS

Dr.Snap: Multimodal Dermatology Decision-Support System *2024*

- Designed and built a conversational prototype that combines skin photos and symptom descriptions to provide preliminary guidance before a clinic visit.
- Developed a dialogue workflow that uses retrieved condition information and prior user responses to generate follow-up questions and narrow candidate conditions.

Bianca: Full-Scale Interactive Refrigerator Prototype *2020*

- Developed Arduino code and electronics and built a full-scale refrigerator prototype that maps handle-press locations to corresponding illuminated regions on the door.

TEACHING EXPERIENCE

Teaching Assistant, Data Science, Korea University *Spring 2025*

- Prepared and delivered tutorials on LaTeX and visualization with matplotlib for undergraduate students.

Teaching Assistant, Artificial Intelligence, Korea University *Fall 2025*

- Prepared and delivered a tutorial on multimodal representation learning with CLIP for undergraduate students.

AWARDS & SCHOLARSHIPS

Master's Fellowship (KRW 12,000,000), National Research Foundation of Korea (NRF) *2025–2026*
Second Place, Korea University AI Tech Day Poster Presentation *2025*
Third Place, Korea University Capstone Design Competition *2024*
Third Place, Samsung Design Competition *2019*

SKILLS

Programming: Python, C, SQL, Git, GitHub, LaTeX, HTML, CSS, JavaScript
ML & Systems: PyTorch, CUDA, Transformers, vLLM, NumPy, pandas, scikit-learn, matplotlib
Design & Hardware Prototyping: Figma, Illustrator, Photoshop, Rhinoceros, KeyShot, 3D printing, Arduino
Languages: Korean (Native), English (Fluent—TOEFL iBT 5.5/6.0)
